FFWD lite

FFWD Cloud-based Time-lapse Network Camera

UM Guidelines

A First Ever Cloud-based Time-lapse Network Camera

What You Get Is A Time Lapse Footage Without Post Editing Process

What you need to do is – Point and Shoot. We'll take care of the rest from the cloud

Preparations

1. Mount your FFWD lite anywhere you want
2. Download the FFWD App from your iOS or Android phone
3. Power up your FFWD lite
4. Make sure your Wi-Fi to Internet connectivity is OK

Setting Up Your FFWD lite

1. Run the app and follow on-screen instructions to move on
2. During the setup, the FFWD lite will be connecting to our cloud server for registering itself along with the user ID (i.e. user's Google account)
3. When done, you will be seeing the live view from the FFWD lite.

Starting to Shoot A Video

1. Run the app and select the FFWD lite that you want to shoot the video.
2. Through the Live View in the app to adjust the angle of the FFWD lite
 - To pan, adjust the seat of FFWD lite
 - To point to the scene, rotate the main body of FFWD lite
 - To tilt, bend the FFWD lite
3. In Live View, click Record button (Default shooting profile will apply)
4. When the video is done, you will be notified

Model: FFWD lite

Power Rating: 5V/1.5A

Operating temperature: 0° to 40°C

Wall Mounting

1. Magnet

- a) Choose a metal (iron) surface for setup.
- b) Apply the magnet on the bottom of FFWD lite.
- c) Place the FFWD lite with magnet on the actual location you need.
- d) Make sure the metal (iron) surface flat and provides enough area to bring out enough magnetic force.

2. Screw

- a) Draw the hole on the wall after point out the actual screw position using the wall mount plate.
- b) Screw the wall mount plate on the wall by the screw kits.

Federal Communication Commission Interference Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Note: The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all WiFi product marketed in US must fixed to US operation channels only.
